MUSEUM AND OFFICE, SUSSEX ST. OTTAWA.

Apr 12th 1889

Dear Sir,

During last summer I found on the Red Deer River Mts. in the Edmonton series (Raranne) a much better specimen of *Abitus Tyrrellii* than the one from Levin Coulee which you returned to me a short time ago. Should you want it at any time, I can send it.

I have also enlarged my collection of plants from the mouth of the Blind Man River (Red Deer R.) some of which you named when you were here last. I think there are a few new forms among them. Any time you are working at these plants I can send them to you.

Yours truly,
W. G. Weston

Dr W. G. Dawson
