

Demure

Warkworth 10. Decr. 1889  
Lawson Esq, Principal of  
Mc Gill University.

Dear Sir,

In troubling you, writing  
you this distant letter I  
crave your attention for a short  
time - Concerning a certain  
mineral deposite I have come  
across namely a great deposite  
of Copper, situated in the Township  
of Belmont in the first or second  
Concession about one mile from  
the C. P. Road in an agricultural  
neighbourhood, The lime stone  
suddenly stops, and this great mine  
rears up from 10. to 30. feet without  
soil on top, shews of sulphides & peacock,  
can be traced across three or four  
hundred acres. and in fact for two miles.  
This <sup>is</sup> has a hole dug on it of about  
nint feet in diameter & as deep.
