

Dec 31st and last of 189

84 Boyd St.

Newton Mass.

Sir J W Dawson C. M. G.

Your Day of Rest duly received
and I sorely regret that I cannot
express my feelings for the high
compliment you have paid me.
Nevertheless it is worth it the same to
me and I assure you now the less
to you its author. It is a wonderful
compilation of Bible facts, proving
clearly its Divine origin and no
doubt has had to do with the fate
of nations in the Past as well as
Present where the Divine Day of Rest
has been ignored Past and Present.
My youthful training learned me to
strickly observe the Sabbath day
and in my travels I have been often
shocked at its mis-use.

Yours very Respectfully

A. A. Anderson

(wishing you a good rest you
and money hand mender
and my returns of them

looked more like pro gas
got in what I call conglomerate,
Said not silver this may
seem strange to you but this
are facts nevertheless the water
hauled one of them brought
me out of a shaft 260 feet
dep by my son's John now
has

The form of the
fractal at Bridgeport can
with trial be traced

I looked to me like a
heptagon and seemed to be
in size larger than a horse
or of 2 year description better if
of the wild. A 74

Dec. 3rd or 4th 1890

P.S. Sir I have come across
several facts or wonders to me
which may or may not interest
you altho you may have seen such
before - The first was
a thin band my fellow worker
discovered in solid coal in
Cowdenbuth Scotland 33 paces
below the surface in the year
57. The next is the fossil
of a large animal near
the shore and about 40 feet
over being the coal seam at
present worked by the International
Cold & R Co Ltd with plain
traces of what I think bones
put between it and the shore
The others I think still more
curious was roads or what
