DEPARTMENT OF THE INTERIOR
UNITED STATES GEOLOGICAL SURVEY

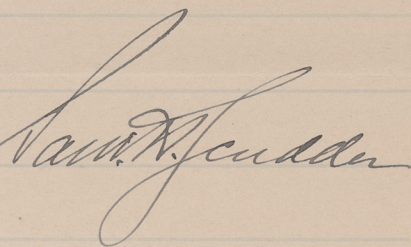

Cambridge, January 21, 1889.

Sir William Dawson,

My dear Sir:-

I am much obliged to you for your favor of the 18th including the letter of Professor MacGregor. None of the points mentioned by him can affect the general classification of the fossil, excepting the one in which he makes the fourth and fifth veins as united before the base, and the points concerning which he suggests reference to Dr. Lawson hardly require it. Please present my thanks to Professor MacGregor also for his services. I will send the letter to Mr. Brongniart today. With best wishes,

Yours very truly,

Dictated
