*Chet St.
Montreal
P.Q.*

College of St. Laurent, by Montreal, March 6th 1890.

My dear Sir:-

Having to explain and exemplify in one of my forthcoming Lectures on Geology the structure of the pudding-stone and of the breccia, would you be so kind as to send me, by mail, a small specimen of each of these conglomerate rocks? you would oblige me very much. - The ^{fine} specimens of the Cozion facadum, Dabos, you have had the goodness to forward to me a few weeks ago have been very serviceable to me in my latest Lectures in Montreal, on that subject. Very respectfully, (R.), Joseph C. Carrier,

Prof. of the Nat. Sciences.
