

Reid

Mugger

Albany

Blairgowrie N.S.

21st April 1891.

Dear Sir

I trust you received the copies of Nature sent to you from the office on the 10th inst.. Before writing, I waited the issue of Nature of the 17th, to see if any criticism upon your paper was contained upon, but as I anticipated no one has yet in an appearance.

annexed are a few particulars in connection with its publication, which I trust upon the whole may meet with your approval.

I have taken the liberty to send

Your volume of the 17th inst., containing
a paper by Prof. Williamson upon
certain new discoveries, which
I thought you might wish to see,
(if it has not already reached
you).

Your paper is being put
into a small pamphlet form,
and I shall have much pleasure
in forwarding you a few copies
when ready.

I remain,

Yours very truly
James Reid.

Dr J. W. Dawson
Montreal

1st Paragraph: The Editor erased already.
The other alterations are by the writer.

5th S. : if before Hooper having been
erased. The writer put Hooper
in brackets.

at the end of this parag: thick
was changed into thicker; after
the proof left, the writer thought,
this thick assumed misrepresents
your meaning, though it is not
perhaps of great importance.

Last parag: the context after large size had
to be omitted through the measurement
of obovate fruits being omitted
in your paper.
