

Customs, Canada,

Surveyor's Office,

10 July 1890

Dear Sir William

I working over my article preparing it for the printers I found that the sections and sketch-map that went with my drawings to Ottawa in care of D. Bailey are missing. I have written to Mr. Whiteaves about it, and he has made careful search in the room where the sections met, and also inquired of D. Bourinot's clerk, but without success.

Mr. Whiteaves suggests the possibility of their having got mixed with your mas. papers and advised me to communicate with you. I do not know whether you will be in Montreal, but

address ~~the~~ these to meet you. It  
it will not put you out too much  
will you kindly look among your  
papers when convenient.

I have lately found a fine  
reef of Copron in our Department  
which I hope to describe soon

Hoping this will find you all  
well and if not at Montreal, in the enjoyment

of your summer home — Yours truly  
A. A. A. A. A.
