

Berry  
St. Lawrence Hall Hotel  
Manhattan

Oct. 28. 90

Dear Sir

My friend Prof.  
Bonney has been kind  
enough to give me the  
enclosed letter of intro-  
duction to you.

I had an attack  
of hemorrhage of the  
lungs in the spring  
& have been advised  
to spend this winter  
out of England in

a dry, bracing place  
of my doctor suggested  
Canada or Colorado-  
especially the latter.  
As I happened to be  
a native of Canada  
I thought I would  
come here to see ~~the~~  
whether I could meet  
of any district where  
the climate is suitable  
for my health. In here  
I should have an  
opportunity of making  
a living by ~~the~~ fol-  
lowing <sup>ow</sup> my own profes-

tion is that of  
an analytical chemist.  
Prof. Bonney told me  
that you were thor-  
oughly familiar with  
the geology of the  
whole of Canada so  
I am venturing to ask  
your advice in the  
matter.

I propose to call on  
you tomorrow after-  
noon in hopes of  
being able to see you  
but would of course  
call at any time

convenient by you.  
my sister &  
the expect to stop

here a couple of days  
& then go on to our  
native town of Kingston,  
Ontario.

Faithfully yours

Edward E Berry
