

Hyde Park, Mass.
5-11-94

Dear Sir: —

Do you remember receiving a letter from me, when you were at the "Thorndike" in Boston?

You then kindly promised to send me some Zoöon Canadense. I don't want to be a nuisance

but I do want the Zoöon. I have a piece from our Bolton locality, but I do not know how to prepare it, so that it looks like animal life — If not perfectly convenient to you will you please tell me where I can buy a specimen. — for I

do not want to trouble you. I know how busy our scientists are here.

I have just finished my fourth year under Hyatt, and his enthusiasm is catching. Fossils are uppermost now, tho' I do not neglect my rocks.

Prof. Crosby has asked me to hunt our N. P. rocks for Carboniferous fossils this summer, and I am anxious to begin. We have been steadily growing for the past few years from the Archæan up. I may come to N. S. with Prof. Crosby this summer if I can leave my family.

Cordially
Ella F. Boyd.

To. Sir J. William Dawson
Montreal
Canada.
