

Mr Medeman

Birkenshaw,

Little Metis.

July 13/94

Dear Mr Medeman,

I have just
found of the 7th and
8th, and am much
obliged by your kindness
in relation to the fossils
of Corvitt's Pit.

I note what you
say as to the lower
coals on the line of
the International R.R.,
and have gone into the
question as to their
outcrop with much in-
formation as I have

before me; and shall
send you a memo,
on the subject this week.

The Louisburg R. R., running
north from the Lowry
Area to the head of
Mud Bay should also
drop these lumber beams.
I shall look into this
also.

Truly yours
J. M. Dawson
