Bank Villa, Belfast Terrace

N. C. Road

Dublin 5 Oct 1894

Sir J. Milham,

You have again made
me your deep debts by your full &
painstaking letter of 24th ^{to} ^{vald.} It is
most helpful; and I thank you very
sincerely. My main difficulty in relation
to the supposed southern seemingly (and more
much) is the seemingly involvement adaptation
of habitat to parasite or parasite to
surrounding habitat eg in tape-worms, bacilli & ;
the seemingly heralding of hiding away in innumerable
sharp bits as - water - all food & dust & &
a pair of death-dealing bacilli or bacteria or
microbes; the annual tribute of 20000 human
lives in India alone to seemingly eg. Sir Joseph
Fayes doubts the small ad-like seemingly the
haunts the Indian Ocean & seemingly to seemingly,
was seemingly ship of a mere seemingly yet seemingly
within 3 hours; the seemingly seemingly; the
squirrel seemingly its seemingly seemingly; seemingly
Ichneumonidae seemingly seemingly also is
habitually preyed on; the seemingly aggregate of

detructa of various kinds; the types of
malignant cancers & the origin of bacteria & virus
function it is to originate diseases.

I have no claim on your precious time;
but if you can give me your judgment in
due time, I shall be additionally
grateful. I may state that mine is not
merely speculative interest in the problem. It
will touch your generous heart, I feel sure
to know two cases (1) A. B. is a man
of intellect & culture, of spotless character &
walk & of wealth. For long years he
used his wealth and cultivated a "talent"
and was under the great Jaykumstey's eye. Now
he is little more than an Agnostic (his
Causa Deo money). Why? Because of the
mode of the death of his only child
& his — the mode not the fact of
death — viz of local-tainted milk. "Haw"
he says and to me, "can you expect me,
St. S. to be in the goodness
& tenderness of God (if God there be) who
plays such a damnable trick, & to hide
in imminent milk so deadly a poison
& slay my child. The possibility of the
fact is nothing to it. Suppose a man
to do it, should we not hang him high
of Hawaii? Or who would not fully

the raso? " (2) C.D. an old paper
in a volume — an edit (copy) digging out
a remarkable old egg under a malignant cause,
with no possibility of small compensation. Such
is the actual example of fine young spirit &
kindness etc. etc. It is I hope &
minutes deal to noble young fellows who
acts to below.

Will you accept the accompanying
vol. of " Samp & Dy & Mjrd " ?
I shall hope that you may kindly
find time to read the section entitled
" Lych & Shewing of Man Expressions &
partly to Cages Jews " Noting Field of
Clark & Gold (p/p 239-42) and " Samp
Memes " (p/p 243-249) and the specimens
of the hymns marked etc. I am to
contents. I rejoice to find a man of
sacred of your extreme position abiding true
to the " old old story ".

Very cordially & gratefully

A. B. Grosart

Geo. W. J. Dawson

over

xx I open this to add that I am glad
 that we so all recognize to "curse"
 recorded in Geology on the ground! My
 I ask if Geology conforms the name
 existence of "Hornby & Smith" just
 to man? If so - it would be
 a striking fact. Similarly I have not
 seen after 5 or 6 years. G.
