Garrison--n-Hudson, N.Y Dec. 19. 1894.

Sir William Dawson;  
McGill College

Dear Sir;

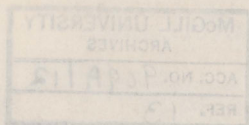

The publication of the weekly journal SCIENCE will be resumed on Jan. 1. under the direction of the editorial committee named on the enclosed slip. The journal will report on the progress of science for men of science.

We hope to have your assistance in the conduct of the journal. There will be needed papers and addresses giving the progress and present condition of the several sciences, short articles describing recent advances and discoveries and reviews of the literature with notices of such other matters as concern the advancement of science.

It is of the utmost importance to begin the new series with work attaining a high standard and we should greatly appreciate it if you were able to make a contribution to an early number.

Very Truly yours,

J. M. K. Catlett
