Sir William Dawson,

293 University St.,

Mont real, Canada.

Dear Sir:

We thank you for your very courteous letter of the 14th just received. We had already sent you Wright's Nature Readers, and are very glad to put you in possession of a set even though you are no longer on the text book commission.

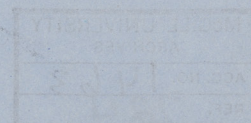

If you find them interesting enough to look them through at any time we shall be glad to know in what respect they should in your judgment be changed before they are put into the hands of the children. They are not intended as text books on natural history. They are simply readers, to be used like any reader, but the subject matter is natural history. The books have had a wide sale and are constantly increasing in sale, and if there is anything in them doing the children any harm, we are especially anxious that it should be eliminated or modified.

We have an excellent book on natural history lessons, an English book, and since you are interested in presenting the subject in this form, you will be interested in this particular book. It is possible you already have it, and if so, kindly hand the copy which we send you to some teacher who will appreciate it.

Yours very truly,

R

D. C. HEATH.
