

Dash Mills,  
Hemel Hempstead.

March 13<sup>th</sup> 1897

Dear Sir William

I am obliged for  
your note and am  
glad to find that  
you are interested  
in the Report on Horne  
It is not however mine  
but the whole credit  
of it is due to Mr Clement  
Reid of the Geological  
Survey - He has since  
carried out a similar  
exploration at Hitchin  
with the same results

as to the relations of  
the implement-bearing  
beds to the Chalky  
Boulder Clay - I fear  
however that but little  
has been done about  
the foraminifera of  
the Boulder Clay, but  
I will make enquiries  
I am looking forward  
with somewhat mixed  
feelings to my approach-  
ing visit to Canada  
I hope that in passing  
through Montreal I  
may have the plea-  
sure of seeing you

It is very satisfactory  
that your son will  
be able to preside over  
the Geological Section  
of the Association -

I am hard at work  
seeing a second  
edition of my Stone  
Implement through  
the press -

With kind regards,  
believe me

Yours truly  
John Evans
