Sir J W Dawson

Dear Sir

Your kind favor is at hand. As you can see by the paper I sent you, I have given more attention to the study of the Foraminifera themselves - their classification, etc - than I have to the questions involved by the finding of them in different formations. For this reason I touched very lightly on that part of the question in my paper. I am very glad to get your suggestion however as to the importance attached to the finding of them in the boulder clays. I have searched what I supposed were the boulder clays without success but will continue to do so hoping that my future hunts will be more successful.

I have not seen your paper containing a

recent list but should be pleased to see it if you will be so kind as to favor me with a copy. I regret that I did not know of such a list ~~when~~ before mine was issued but we labor under much difficulty in our society from the lack of many of the scientific journals. I supposed however that the articles I referred to of yours in the Canadian Naturalist of 1879 were the last you had published on the subject

Yours very truly

I have very truly
 Yours
 J. M. Weston

The two published in the subject
 Canadian Naturalist of 1897 were the last
 articles I referred to of yours in the
 journal. I suppose however that the
 few the lack of many of the scientific
 notes much apparently in our society
 before mine was made but we have
 not yet known of such a list when
 favor me with a copy. I regret
 see it if you will be so kind as
 recent but not should be pleased
