

London, June 24th 1897

Geol Surv

GEOLOGICAL SOCIETY,

Re Speanney

BURLINGTON HOUSE, W.

Dear Sir

Referring to your letter of May 15th last I beg now to state that, with the permission of the Council, I have forwarded to you per express such specimens as we could find corresponding to your description - that is, five Lepidodendroid specimens. All the other specimens in our Nova Scotian collection are Calamitean or Sigillarian, and there is nothing whatever that appears to answer exactly your figure 2 enclosed. I hope, however, that what is

sent on loan may prove
useful.

I have to thank you
for Dr Adams's notes. These
have been placed with the
specimens, as you suggest.

I remain, dear Sir,

Yours faithfully

L. L. Belinfante

Assistant Secretary
