

Allan House. Stouffville
5th July 1899.

Dear Sir

I have taken the liberty to forward you the found specimen, it seemed to somewhat resemble a spruce, and some years ago I supposed it must be such, but your mentioning found recalled its apparently cuneate form. I trust you may find it the object looked for. When any other Barbe specimens come to hand I shall carefully look over them with the hope of finding traces of others, though I doubt if anything similar to this specimen sent you occurs amongst them. Holiday
Yours
T. C. C.

Having arrived I should not
expect you to trouble yourself
about this object until later on,
and in any case, it need not
be returned till you find time
to mention your opinions of it.

By the way there may be a
few *Coidness* specimens worthy
of sending you, but as I have
just arrived from there, there
has been no time as yet
to examine them. *Palaeospondylus*
seems not difficult to find
in a very perfect state.

With best wishes
Yours very truly
James Reid.
