

Stonleigh Abbey

Kenilworth

England

28.7.97

Dear Sir,

Some time ago I ventured to trouble you to ask you if you would do me the very great kindness of looking through some papers I had written for children, on subjects connected with physiography. In your very kind reply you were good enough to say that if I sent you copies of proofs of my early sheets, you would read them, & that they might possibly also be looked at by Dr. S. M. Dawson.

My series of papers on the

Natural Science of the Book of
Job have been accepted by the
"Sunday at Home", & are to
begin in the November No., I
have received early proofs of
those ^{papers} about which I ventured
to trouble you, viz. on

"The Foundations of the Earth"

"The Sea"

"Snow & Ice"

"Rain",

& I now venture to enclose them,
& to remind you of your most
kind promise. I need hardly
assure you that your revision
of this portion of my work
would be of the greatest value
to ~~me~~ me.

With many apologies for
the trouble I am giving you,

& grateful thanks for your
kindness, I am

Yours sincerely
M. Cordelia Leigh
