

Dawson

Montreal Saturday 188

Dear Sir William

I will enquire - it seems to me at first sight that the best plan would be to have a good woodcut made of the line paper for a newspaper and then have electrots made as needed.

The exigencies of the Sunday newspaper demand something which can be printed with their type in a rapid press. The Star and Witness stereotype their whole forms and the ~~the~~ low relief process cuts won't suit. The Star had an admirable drawing of Drummond but they made him look like a ferret when they translated it into their stereotype.

In the meantime I will inquire

Yours truly

Samuel Owen
