

Spencer

788

J. W. Spencer, B.A., Sc., M.A., Ph.D., F.R.S.
Vice President of King's College.

My Dear Sir

Since your appointment to a Professorship in this University in the autumn of 1879, you have filled the Chair of Chemistry, Geology and Mining to the entire satisfaction of all concerned. You have been an excellent teacher in the subjects of your Department, which has greatly improved under your management. I am aware that both before and since you came to our College you have contributed many valuable papers to scientific literature, especially in the subjects of Geology and its Allies.

You have most ably filled the position of Vice-President, manifesting an interest in the prosperity of the College, which has resulted in your undertakings being successful.

It is with deep regret on the
part of those that remain,
that you should ever think
of severing your connection
with our Faculty, and the
difficulty of replacing you is
apparent to all the friends of
the College.

Yours very sincerely
John Dart, D. C. L.
President.
