Below the line

Below the big
Lump of Dunlop
Clay 60 feet or
more

Good specimen above
the latter with
large laminated Dunlop

Red Boulder clay

Gray big Dunlop
Laminated & thin
of large boulders

In places seen
Great a number
Rocks - shaly
And granites

Two Pistoles
In river bank
near Mill
Ridge of France

Big steep up
to top of ridge

Recap of France

Big steep up
ditch up the
15 feet a mile
high - many
fosses all over
observing that
old gravel
bank - not
normal

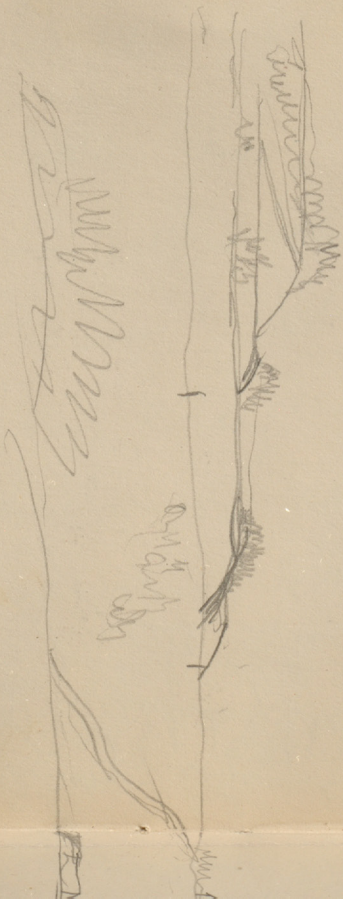

Railway cutting
Essex Run

— feet above
Sea — & above
this clay with
beds of fine
Laminated shales
20 feet deep
Silted beds

Clay blue
Dumfries shales

20 feet deep
Solved Sealer

Clay blue
Dumphy hat
typical stuff

2.5m
40 feet above level at x

of sand
House ground
in what are
by large groups
Boulder
seen

The gravel
rounded &
Mud has
between the
sand dark
- carbonate
Zincic gray
No shell seen

Section 1400

such a great
no shell see

Under the
Leda clay at
the bridge
a dig for a
few hours
exposed the
stratification
under the
Leda clay

In the creek
Went a few
large deer
went builds
one seen in
the day

Went to
Clay when

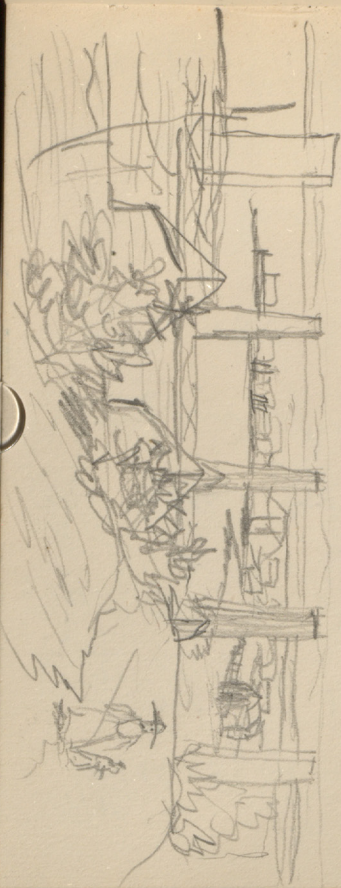

Clear Sunday

Under some
clay when

Clear sand
to be seen there
20 feet thick
the level
sand & shales
seen in both
pieces of
sand bar
No mud

but maintain
shape on the
shata nuff
long up line

1
Ferns & Bulbs, Paul Smith

West of Sledge
is a place where
digging for shells
for man —

Here rocks in
Leak up with

a shot sand
& trap they
clay when

It is I think

I hope they
can see

It is I think
a case of second
step from above

When here a
surface of
fractured clay
a few SW of here

top of terrace

Same as for
terrace above
on the side
18 heights
= 18 x 5 feet

$\frac{3}{90}$
Red clay heavy
to top of the
terrace

a little sand.
say a foot or
two. They

tell me

Clay here
may be say
to equal the
whole weight

from the beach

a little sand.
Say about an
top. They

Lead & Iron

Clay here

may be say
to equal the
whole weight

From the head
Dug 30 keefes
By 150 feet
Mud of this
Leder clay
Shall open
It is good
into many
Clay heaves

Leda clay at
level of Road
beams were
full of barrels
Large Lammers
in woods to
the West
and is cut
into deep
Lammers many
filled with

the sand or

The sand or
gravel

At a cutting
near where
Pm Road
crosses the
Leek Clay has
a sharp supply
of sand and

At present are
very many
large well
rounded
laminated beds
thus
