you to  
 add. I hope it  
 will have found  
 way by this time  
 for the copy of  
 "Nature" which I  
 sent your father  
 M<sup>d</sup>.

Dear Papa

I enclose an account  
 of my expenditure from that last sent  
 to the first of this month, which  
 I hope you will find right.

You wrote some time ago about  
 lodgings for you & Mamma when  
 you come here. I took occasion to  
 speak to Dr. Davies on the subject when  
 I last saw him. He did not seem to  
 know much about it, but thought  
 that if you stayed at a hotel you  
 would have to pay for everything, accord-  
 ing to what you ordered, they not making  
 any arrangements for boarding by month  
 or week. He seemed to think that you  
 would be most comfortable, in lodgings  
 where board was also supplied. I am  
 not quite sure, but think that  
 Mrs. Fisson (the french gentleman) will have

for you come, so that should  
inclined, you might even come  
this wise I daresay I might find  
it a ble place. Please tell me what

I have since I last wrote seen the  
announcement, that Dr Carpenter is to  
have an assistant, in the newspapers,  
& heard a Mr Smith, brother of dictionary  
Smith spoken of in connection with it.

I was at the meeting of the Geol Soc last  
night, & heard papers by Mrs Etheridge  
& Mr Lloyd, on the Geological position of the  
dolomitic or reptilian conglomerate of  
the Bristol area, & surface deposits of  
Avon & Severn valleys; respectively.

Prof Ramsay objected to the use of the word sea  
in Etheridge's paper, & said that the new sea  
mass must have been formed in conditions  
more like those of salt lakes, as the Caspian, Dead,  
& Utah. Prof Huxley then chose to misunderstand  
Prof Ramsay's use of the word sea, & said that the  
Caspian & Dead seas, were called seas. Prof  
Ramsay answered, & I think got the best of the  
argument, but after it was over left the room.  
Huxley seems always to be lying to pick some flaw  
to prove his own superior erudition.

I Am your affectionate son  
George Lindauer
