

George Gmelin / London June 24<sup>th</sup>  
Friday.

Dear Papa

I this morning received  
your letter dated from Dalkeith  
as your plans seem to  
depend on it, thought that  
I had better write tonight  
to let you know about the  
examination.

The Theoretical Chemistry is  
next Wednesday, the practical  
~~on~~ Thursday, & the exam in  
Physics, on Friday. so that  
I hope to be able to leave  
for Scotland on Saturday.

probably by the night express.  
I should like better to leave  
on Saturday morning at 10  
but hardly think I will be  
able to get all done by that  
time. However I will write  
before leaving, or if uncertain to  
the East Telegraph by which  
train I will come, so as  
not to put either you or  
the Bells to inconvenience.  
If my leaving thus soon  
will send you off home  
~~so soon~~ immediately I am  
almost sorry to be able

to do so. Though not at all  
sorry to leave London for a  
while.

The weather is now much  
cooler & more pleasant.

I will send you boxes off  
to Miss Crow early next week  
& as Miss M<sup>r</sup> Andrews has  
has not yet arrived will  
write to him about it either  
tomorrow or Monday.

I don't think I will be able  
to pay the boxes right through  
from here, at any rate not  
the charge for delivery in

Liverpool which will be  
rather awkward as Mr Crow  
will have to pay hotel on receiving  
them.

Several people have spoken to me  
about some book which you have  
been publishing lately, which  
on enquiry seems to be Acadia's  
Geology. Surely some reviews  
or something of the sort must  
have appeared to give them  
this notion. (that it has just  
come out)

Your affectionate son  
George Inghamson
