It is no use Continued
trying to enumerate
individual things, as that
would be impossible.

I saw a card of pottery
sent by you. It seemed
to be the only pottery they
had from Canada.

I am now looking at
an immense collection
of models of machines
from the Patent office.
There are thousands of
them, & to examine them
in any but a very
general way is im-
possible. There is a
large collection of stuffed
animals & birds repres-
enting the Zoology of the
United State. These among
countless numbers. R.D.
