---------	------------------	-------------------------------

I have now Philadelphia
been here a week. Sept. 13.
and although I have seen an
endless number & variety
of things, I have not seen
a hundredth part of what is
to be seen. of course I can
never hope to see all that
is here exhibited. What I
have seen I think I shall
remember pretty well, as
I have taken notes of all
the interesting objects. I
should like to stay a few
days longer as while I
am here, if you have no
objections I have plenty
money. This morning I spent
in the Machinery Hall.
It is enormously large &
the exhibits it displays are
very various. All sorts
of machines & processes in
working order R.D.
