GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn B.L.D., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

April 1 1882

Dear Father,

I will attend to
the matter - names of
naturalists &c - which
you mention, though I do not
know if I can do much.
I have packed up a suit of
express, prepaid, all the
plants collected last summer,
with the exception of a few
fossil woods. There are also
in the lot two small specimens

of Vancouver Island coal
 which are not needed here &
 may be interesting to you.

A few fragments of plants from
 Coal Banks Nelly B. which
 I omitted to include in the
 box are sent by mail in a
 small parcel.

Have promised Pleaslett with
 the plants to be wanted. Saw Mr
 Helmes the other day. He says
 he is sorry the N.S. people would not
 culture the plant for sept. of the
 S. d. fields, but that's always
 means to keep it on for a
 year at least.

Tell mother I have been very busy

200

This week out at
 Swallow Falls, very like &
 near the sea is. In one
 mountain for since I left.
