

Genge

GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn L.L.D., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

April 17 1883

Dear Father,

I cannot find out anything about the lists of plants from Vancouver. They are not here among other similar papers, though there are one or two notes on fossil woods West Hills (Bell) & Saskatchewan (Selwyn) I think the only list of any importance must have been that of 1871-72. It is published in the report of that date, but

of course without the reference  
numbers to the specimens. It  
is possible that Richardson  
might know something, & might  
be worth while writing to him.  
I think of leaving here next  
week so as to be here about a  
week in Montreal before  
sailing.

Yours truly

George M. Dawson
