MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

6 Feb.

1885

Dear Father,

Enclosed is a list
of the Cretaceous & Tertiary
plants packed by our writer
in two boxes & sent by
express prepaid to your
address McMill Coll. Museum.
The plants are separated by
sheets of paper so that you
can get each lot by itself.
I have worked the Oregon ground

Got on the list in red. The location
 is also sending them by mail
 a lot of slides of silicified woods
 from the Museum of Cypress Hills.
 He is pretty sure that all the lent
 cores actually from the cone bearing
 beds. There is no need of
 immediate examination of these
 or the other plants.

The maltwood arrived safely
 yesterday. Much obliged

Yours

George
