

Geny
Ottawa. 27 July
1886

My dear Father,

Enclosed please
find proof of your paper.
I have gone through it once
& that our sent is the
same with some corrections
& queries of Boodles &
one or two queries (in red)
of my own. Would it not
be best to work number
the figures consecutively right
through the two plates as we
do but know in which
plate a particular figure may

So get? You have put
 Plate I & Pl. II & these
 have been inserted but could
 yet be changed. Mr Lamb is
 drawing some of the Lines
 now.

We were much alarmed
 on ~~Saturday~~ Saturday to see
 your names prominently
 placed in the account of
 Railway accident, &
 were so as we did not
 receive any word about
 it from you. However
 William succeeded by
 Monday morning in getting

an answer from
 Mr. Crow. to say that
 the injuries you had
 received were 'quite
 trifling' I hope sincerely
 that this is correct
 but fear that the shock
 & shaking up which
 you all must have
 experienced may take
 some time to get fully
 over. Weather here is

4

turning warm again but
at 11:30 to 12:30
decreased. See to change
of getting in my field work
unfortunately a car
from associate work on
my own report etc.

Yours

George
