

GEOLOGICAL & NATURAL HISTORY SURVEY,
Alfred R. C. Selwyn, C.M.G., L.L.D., F.R.S., Director.
MUSEUM AND OFFICE, SUSSEX ST., OTTAWA.

13 April 1887

My dear Father,

I have looked up the three specimens
of woods (2 duplicates) & found the
origins. The piere specimen is from
a rotten terebinthifera fragment included in
Pierre shales with marine fossils.

I enclose the ref. to Davis's observation.
Lyvell tells me that Spencer Creek
specimens of plants Pierre or Benton are
among lot collected by him in 1883 hence
our mobility & find them in 86 lot.

Mr Weston mentioned today that Dr. Wright
has still had his Volved tracks from
Ariz. etc.

Yours

Guy
