My dear Foster,

I enclose at same time the list of
the Greenland plants. There are extensive
tables of species which may be of use & you
will find besides in the end of the volumes
a résumé in French of its contents.

Respecting title of your book - Would not it be
well if no other change is made, to reverse the
order of the present title so as to read

Bible Lands & Modern Science,

being notes & observations
on a journey etc

Yours
Seape
