

S.M.D.
16 Jan 1888

My dear Foster,

I should have
acknowledged your
letter containing cheque for
\$200 which duly arrived,
& of which you remind
me, in your note
received this morning.
Referring to enclosed note
I fear I cannot give
any very satisfactory
reply. Except in the

would be vicinity of
 mountains where glaciers may
 have been there is not the
 same than I suppose changes
 of course in streams as in
 the Boulder clay covered northern
 region. This theory about
 the sea rising down when
 the mountains were
 elevated seems a little
 odd some

G. W.
