MUSEUM AND OFFICE, SUSSEX ST., OTTAWA.

21 Nov. 1889

My dear Father,

I send by mail today a little  
box containing a number of micro. slides  
illustrating interglacial peat, or lignite rather,  
of Bell River. Some prepared by myself some  
by Thomas of Chicago from my specimens, also  
a few pieces of the material itself. Also  
a specimen of interglacial peat from Minnesota  
rec'd some time ago from Thomas, showing  
an impression of a leaf as noted on label  
enclosed with it. Also specimens (slides) of the  
Solignath wood from Boulder Clay.  
The slides would require a lot of working up &  
examination which I should suppose you  
would hardly be able to give to them. When done  
with I should of course like to have them back.  
Ami has nothing particular new in the plant  
way from Green's CK.

Yours  
George
