

George

Hibernian Club,  
Ottawa.

24 Jan 90

My dear Father,

I have to thank  
you for your kind note  
received this morning &  
shall endeavor to take every  
care for a few days till  
I have quite got over my illness.  
I have ventured across as  
far as the Club today, for  
the first time, & write you  
from there. Aunt Mother  
got down comfortably. We were  
rather at a loss to know what  
had become of her & do not

1st know how she got  
across from C. P. R. to  
C. A. R. Station & made  
the Connection she did.

I have mailed to you today  
a specimen of a fern apparently  
just received from boring at  
Hastings near Vancouver B.C.

Do you happen to know the  
species or how you saw anything  
like it? It would of course

be interesting if it should

afford any clue as to you of

leads our being passed

through. My own idea is

that they may belong to Whites!

Puget groups = Laramie, but I do not know  
any remembrance of Seno such a fern type.  
The flc is down 570' & is joining on

Yours  
Gurze
