

Wallace Place  
Feb - 24<sup>th</sup> 1892.

Acc. 1443

~~Carry my hearty  
greetings with the letter  
I am sending you,  
and I hope  
you will be well & happy  
in your new home.~~  
Anne & mamma

It w<sup>ll</sup> take a  
practiced reporter to tell all  
the events of the week but  
first - I must deliver my  
self of some special remem-  
brances intended to me - I have  
two special messages of love  
& gaud will speak Mrs. Redgate  
who says she has been over-  
burdened by letter writing  
as w<sup>ll</sup> make writing - her  
Cassels also sent me several  
messages, & three visited me  
of tea to specially enquire if I  
desire her love - Also Mrs. F. A.  
R. Molson & some one else who  
was very special, but I can  
not recall -

I had quite a 5/- tea myself <sup>Thursday</sup> yesterday - " in the

I am writing to you this evening & the first reason comes that I have  
to receive Dr. A. Schleicher as one of his students  
I understand he appears - I thought - is quite a man  
now so on my account it will be a pleasure to him  
to meet - & to have his J.A.B. to answer to  
such confron - however I do not do no more  
& shall no instruction of appearing - till I may  
get credit messages from Dr. Schleicher  
Dr. Schleicher & small his Malon come down  
in the evening & unless so has to say I do  
up on the road carpet & because I smile  
to the road - and is excellent I was never  
so much to believe - the greatest  
success - locks & not be taken & then the  
say several hundred people - who had as  
otherwise far seen their way in - I consider  
success was so succeeded as the 10 minutes had  
spent in getting down the stairs in conference and  
the 10 - It is not clear - however the greatest was

feeling - She knew the general proposed that a Dr. Grindal be sent to express his own regret & share the audience - as does common custom & practice & culture among Dartmouth professors & students & most all Americans have immediate sympathy with Garrison as he did in his cause - I am glad to say - Garrison was arising & had had an hour later, received like a prophet - another & as the same time a telegramme addressed to Mr. Garrison - was as follows - "Dr. G. - you are requested to meet the members of the Boston Anti-Slavery Society at the Boston Hotel on Tuesday evening at 8 P.M. to consider the best mode of action to be adopted to aid one else - After the meeting a luncheon has been arranged for the speakers - I do not know if I can go to the speakers - but there has been rather a general abstention as to whom, besides myself, to receive in the evening - but I am

interrupted by the - I told B.C.  
bring anyone up after the  
meetings - so he waited some  
10 or 12 - & let me know at  
lunch time. Dr Braymore - Dr.  
Mrs Haue. Selewyn - A Mr. F.  
Toronto - one p. Keviston &  
others - & I sent - second sweep  
riders on horseback "i.e." the  
children - nurse & Miss H. &  
& collected Mrs Mayse & her daughter  
Miss Leanne & Mr. Campbell  
Mr & Mrs G. Taylor - I tried  
for others who came not  
also. Let Florence know -

Friday morning was occupied  
with the meeting which began  
shortly after 10 of 1 you will  
see the account in the paper  
I never listened to a more  
interesting, brilliant, & clear  
succession of short speeches -  
When the meeting broke up at  
1 P.M. it did not seem to have  
been too long. The remarks of  
his Excellency & Sir Donald were  
the only ones of any length -  
Repeated references were made  
to you - with the best taste  
& most sincere & gratifying good

2

amiable & of course the wedding  
was not planned for a  
big reception. We had Prof.  
Barker, & Col. at Leedon  
Saturday. Dr Eggleton & some  
one else had to leave early  
late in the day, their hosts  
having arranged other plan.  
The reception at Sir Donald's  
was very pleasant & room  
enough to get about though  
a very large number must  
have been present. I was  
sorry that a member of the  
Academy did not be present  
as they did not get back  
from Kedron in time.

Luncheon Dr Bay moved away  
up dinner with us, then  
Mr Haue came in & finally  
the great - one I - appeared &  
stayed to tea - so now I do  
hope we have finished with  
the whole thing. Though it  
has been pleasant enough.  
Still my heart has been set  
this evening on seeing all I  
of the children & they have  
really been very well & very good

I thought I'd <sup>you might say</sup> consider the  
education they are getting. All  
all brilliant; as though you  
the drawing, is doing all I hope  
of it - & Clare is getting a pretty  
good introduction to French &  
all three. Delight in the daily  
music - & the big ones are  
also taking a good deal of  
care of the little ones - Ruth has  
the small children for half an  
hour every morning while the  
nurse is at breakfast. & Clara  
goes out with them for a  
short hour before lessons,  
while Con & B. take a quiet  
hour to their reading & writing  
if I'd only get a clever teacher  
I'd wish no better - better scheme  
than we have for another  
winter - so many outside  
marriages, stay outside when  
there is no school going. & Con  
and is improving so much. &  
Ruth is quite clever, enough  
& growing too fast to need any  
pushing. However we shall  
see - Wm has seen a good  
many of these strangers & I can  
hardly believe what we used to advertise

him & his messie. Our Dr. C - ask the German  
of some one else all strongly advised B. to  
recommend Palestine to him. & say that he  
had heard far less encouraging news so far, &  
that so many that before the archeological  
can be said far less than of last - If now that  
he has appeared to Haneskuney to come as so  
many - here - kept on, on any other ground  
the C. I. R. is such a big thing that it seems  
if he comes - get on sooner & later, though nothing  
in the meantime time has been lost.

The changes have been less  
classical well, according to his  
much surprise at the great appearance  
indeed. - & all acknowledge that the much  
buildings & their appearance are surprising, &  
any thing in the world - altogether I think he  
will be much more surprised in the buildings & his  
of his country than ever he has seen, though

of which have made our representation for each year  
the entire continent. This has been done  
freely - though all this has on every occasion  
appeared to any with spaces he has known  
that no hand of any kind of man he has known  
or referred to ever had a mass-species - & character  
of difference that is greater to his scale - I can  
represent from looking upon thousands of other  
of the same kind - The total number has  
a species-like appearance to me  
that agrees well with the following  
which appears to me to be  
easier trials. I can say that  
as seen a life of care, & complete - & complete which is  
not - equal to bear. I venture his own judgment  
I do think that the combination of so much  
he has hoped for in another  
numerous attractions & utter want of resources - & the  
habit of good living upon his hands - as a check &  
a marshy, all prairie to him as the Missouri line -  
and so many collectors - but I have no idea

3

they can be resolved - & it really  
presents itself to my mind as a  
choice between a few years of  
storm & trouble & a sudden & ~~safe~~  
when nature can bear no more, &  
a much longer term of tranquil  
years of honourable retirement  
of pleasure in society, & your  
family - & the minor details of  
life of this applies equally to you  
both - As to the anxiety for us - the  
surely is where ~~will~~ <sup>shall</sup> come in  
I think there is little doubt that  
B's position here will improve  
before long - nothing very definite  
to report, & but it is calling &  
charlino before - George is already  
a distinguished man - I am constantly  
being assured that he will be  
knighted - & if not wealthy, he will  
have all place & honor & regard  
the world over furnish - ~~you~~ will  
come to his kingdom somehow, &  
if he does not - I do not think it  
is your duty to provide for him  
& that it would positively be doing  
well that you might come - to  
allieve his position to influence  
you - There are always, deserts  
that may overtake any family - but  
that shd. not influence your dear son  
you - As to Rankine I am  
not sure that it w<sup>ld</sup> not be a  
positive benefit to him to know he

was obliged to stand on his own resources - you will see  
any event have a home to take him into if need be

another thing you may depend upon is that the ~~former~~  
have all contemplated the possibility of papa's declining to resume  
his duties & as a result of my observation, & making notes &  
well as little chats by the way I ~~do~~ report that they bear  
clearly in mind the necessity  
for their honour & that of the University  
of giving some sufficient sum  
for horararium - to papa - also  
that the more courageous or  
not afraid of seeking & finding  
a successor who will not be  
unwilling to sit in the vacant  
seat - Also, that notwithstanding  
his unrivallied opportunity, there  
is not one man from Prof. Dr.  
Johnson's school to the newest lecture  
who would tolerate the mention of  
Dr. Johnson's name in that con-  
nection - & I do beg & pray that  
papa will not put himself in  
the advices position of making a  
suggestion which will leave him  
a minority of one - amid a dis-  
cience of dull & unius - I have but

as weared as I do for the years & activities of his  
service - but he has made himself so unpopular  
every cannot - that none the respect - & the to Fugitive  
refugee service - There is no exaggeration in con-  
cerning you -

as regards the Arts - I believe the question  
concerning his service between his Meta & & his had  
as to whether it was not he well to have been in  
the building up of the new pile - & seeing there is no real  
feature of the old building's aiming  
& sufficient to prevent the old building's aiming  
himself as a family we in a suffer, & set to work  
over concern, built, that has been previous in our con-  
cern concern, certain qualities a fact, that  
the mother race has been collected upon  
of credit - to its builders, for the reason collected upon  
the tables - partain - & took shelves to be put in  
elsewhere -

To August 1863 seems helping him bring  
only his old gray - of course and to do others.  
his wife to see that Fugitive who had soon  
back to the Comstockton as all useless he has off-  
with muscle off his mind that is to be his last  
substance as head of the Comstockly - & that he still

give a definite seasonability to his habitation & let  
the scabbard bear a necessary badge - he means  
retaining his nominal headship & say far the  
most - decided than there might be his habitude  
some intermission of that the scabbard can  
be made - To see a number trees stand each as  
probably not - feel the weight of responsibility  
so great - or strong so surely about each  
another as is perceived by -

These are my views - If any  
further light - bearing upon the nature of custom  
will gain me - I shall be very glad to have  
such upon this subject more fully developed  
I suppose so many as are - in time to have  
a public character - still bear some kind of  
mark such marks of white horse 2 tail & 2 legs  
similarly as - the brand intended which sawdust  
glow sticks & whips all - said to occupy one as an  
easier coming back under cities - back to Com  
Wilson has given up his services now long / so he  
that will be out of town - and - said to be  
there for a year - since about them if you will
