GEOLOGICAL SURVEY OF CANADA,
George M. Dawson, C.M.G., LL.D., F.R.S.,

DEPUTY HEAD AND DIRECTOR,

MUSEUM AND OFFICES SUSSEX STREET, OTTAWA.

Oct. 19 1897

My dear Foster,

Since I got back here
Ami has looked up the specimens
which we have under the name
Lepidophobos as like it. There
are very few & they can easily
be sent wherever you require them.
Several of them seem to be exactly
named — a couple, Ami thinks,
are merely Lepidosteus.

I have not yet seen William
since his return, but had a conversation
with him on the Telephone yesterday.

& to give me the latest news
from Montreal. I am sorry
to hear that you are not probably
enjoying your usual strength,
as it must be a great
disappointment to you to be so
long kept quiet. I trust,
however, that the Coldest fire
weather may tell in your favour.
Mother's hope is keeping
well. Let me know if there
should be the slightest service
I can perform of any kind.

Yours
George
