Geology
Oct. 28. 97
Ottawa.

My Dear Father,

Mr Whiteaves

has dug out the little
Crinoid sent by Col. Grant
to you, somewhat worn.
It looks a little better
& he is sending it,
with one or two of ours,
to Miller for an
opinion. He says now
that Miller only knows
his own species!

I am sending you copy
 of the article written by
 me for the B. A. G. S.
 Handbook, of which I
 have got some separately
 printed.

Mrs Rudolf & son came
 in yesterday. They had
 already seen nearly
 everything in Ottawa
 for themselves. I showed
 them what we have here
 & in the evening piloted them

out to William's house where
they stayed most of the evening. They
intended going on to Toronto this
morning & so I suppose done
so.

We are getting a few showers
today for a change.

Yours
George
