

GEOLOGICAL SURVEY OF CANADA,
George M. Dawson, C.M.G., LL.D., F.R.S.,

DEPUTY HEAD AND DIRECTOR,

MUSEUM AND OFFICES, SUSSEX STREET, OTTAWA.

Dr. Dawson
New Y.

Dec. 4 1898

Acc. 1377

My dear Father,

I have a Post Card
from R. Friedländer & Son,
Scientific book-sellers in
Berlin asking for 3 to 5
copies of your paper in
Trans. R.S.C. on Lepidophlois
with invoice. I do not
know whether you care to sell
any of these or if you have
plate copies to spare, but
if you wish to do so you
might send copies to me to
be forwarded. If addressed
to me officially they will

will need to be stamped.

I hope that you are keeping well & that Walter also is taking all due care of her health. This continued mild weather is pleasant in helping us to get over part of the winter early, but the proverbial 'green yell' is not bracing & there are many people here suffering from severe colds etc etc

Yours
George

Enclosed is a note from that nihilist (?) Keopokkin, about the Dog — which may interest Walter as she has been studying them.
