

Ottawa. June 29  
Dr. G. M. N.

My dear Father,  
although we  
are approaching the  
end of the month the  
weather continues quite  
cool & often stormy.  
Politicians begin now  
to speak of closing the  
session within a month  
or less & this may  
take place provided that

no new Cambrian  
 water crops up,  
 Matthew is going to do  
 some work for the Survey  
 this summer on the  
 Cambrian of Cape Breton,  
 which may have interesting  
 results. He has not  
 much free time, but  
 probably can make  
 some good collections  
 from what is practically,  
 in regard to Cambrian,

an unworked field.

I saw Victor the other day &  
 heard from him yesterday by  
 phone. when he had passed his  
 first day of exams. to his  
 satisfaction. It is intended  
 I believe that he should leave for  
 Mexico tomorrow after getting

through his last Exam.

I hope that you are benefiting from  
 rest & the sea & endeavouring  
 to take all the pleasure you can  
 out of it

Yours  
 George
