

George

Saturday 24 Jan

3 dear Father,

I am sorry not to be
able to visit you today,
but Jim & I cannot get
the map work I am busy
with done in time. Next
week I will surely be
done & probably about the
middle of the week
Pop. Cofer has spent some
days here & much of my time
has been broken up with him,

I am very glad to hear of,
 however, as he has now
 seen all we have & seems
 interested in it, particularly
 in my reading of the strat.
 position of the beds. I doubted
 about advising you of this
 visit to Montreal in advance
 knowing how busy ^{you} ~~you~~ must
 be, but feel sure that you
 will enjoy seeing him
 as he is surcharged
 with palaeontological lore
 of all kinds, & is kindly

very pleasant. If you
 show him your Collections
 from Ross (Irvine Coulee)
 & Medicine Hat you may
 tell him that the former
 (at least all below the
 Carbonaceous horizon, in
 the pale beds) come from
 the upper part of my
 Belly R. Series, while
 your large dinosaurs
 from Medicine Hat come

from the Dawe series,
but probably a little lower
horizon in it.

Yours
George
