Dear Anna

Nearly across the Atlantic

at least 5 years to July year some

through the danger of a storm

got to Liverpool on Sunday evening

as I told you in my last. Monday

took the train to Widnes

but Phillips there & spent the day

looking at various chemical works

in the neighbourhood of especially the

Copper works & a very large alkali

57 - The time passed away so quickly that
of presently we discovered that the last
bus had gone & so I had to stay there all
night. I got back to Liverpool early on
Tuesday forenoon got my things ready to
leave the hotel & called on Mrs. Grove
at his office. When I returned to the
N. W. Hotel I was surprised to find Mrs
Lunn & Mrs Ferris there. They had just
arrived from Canada, & were en route
for some place - I forget where.

I received before leaving a little
parcel & post from Mrs. Noble
addressed to you. It got partly broken
few & reveals some fascinating colored
silk & paper.

My Regt & an Aide de Camp with
some 200 boys & girls are passengers
in the Caspian. I see they are just
bringing their boxes up onto the hold.
There has been in consequence quite
a succession of meetings & meetings of

• Various kinds in the forward part
of the ship. Last Sunday we had
service in the morning in the Cabin
& during the afternoon forward.

The Chapman officiating being a
experimental chaplain who is on his
way to Halifax -

When I began to write the stewards

began to set the table for dinner

& so my letter has been written in

fragments & the thread of the narrative

broken. So please excuse incoherency.

Best love to yourself & all & tell

W. R. & E. that I don't forget-

them though I do not write.

Your affectionate son

George
