Montreal.

March 188

Dear Lady Dawson

Your kind note of the
30th ult. has had the pleasure
of getting yesterday and can
only now say how glad I shall
be if I can in any way aid
in accomplishing the object
to which you refer and which
if carried out would doubtless

result in great benefit
above to our own community
but to the Dominion generally
by advancing the cause of
scientific teaching. Could
such a professorship be
provided you sufficiently
recommending it to the honours
of the University & appointing the
professor would be a very
good condition
You may be assured that
you were good enough to
speak true as you did

about your son William
and his prospects the other
day and you may feel assured
that in so far as it may
be in my power to assist in
the way spoken of I shall be
most happy to do so.

I of course quite understand
that the suggestion came en-
tirely from yourself and shall
strive to effect it so

Believe me
Dear Lady

Dorset
Dorset

Had some conversation
with Bro. Jones & St. John on
Saturday about your case,
but have not had an opportunity
of returning to the subject
since receiving your letter
