Mrs

Dearest Mother

The Important
day is over, in fact the two
days - Friday, Kettle had his
usual tea to Mrs C, Mrs J &
K - Molson - & Miss ^{Mary} Campbell
also Carew - Wilson representing
the grown-ups. I saw a very
flock - Victor - seven, I little
I summoned the small ones.
They all behaved very nicely
& really were a pretty sight
at tea - even baby behaving
with great propriety. At
Kettle's 10, & Victor's & Cavell's
which were set in snags
& burned beautifully for a
time, & then having dried
the snags, the whole plate
flared up, to the immense

joy of the audience, Eric bore
them away calmly, as usual
& with no harm to any
things. It was a great
blessing to see them all col-
lected so well & strong - & there
has been a very unusual
amount of sickness. I am
told.

We kept N. mas on Monday
& did not do anything
very special the early
part of the day. A bitter
cold day it was. About
4 Will with Victor & I went
came, & then a large bundle
out of which we carefully
extracted Carpy - We had
a small N. mas tree, which
really made quite a pretty
sight, only the carnegias
& Cavellus, & a few light
things upon it, & the rest
on the table - We began
with baby, & gave her a
little chair, when she calmly
sat down before the tree &

no need to arrange, & rearrange a little
has of strikes: making a pretty little
unborn scene picture, but - determining
me a little of the more with the
muck - rake who will not raise his
head to look at the places above.

After the bustle of the presents, we
had tea all the children. Caddy & Willie,
Nat - sisters, coral turkey & tongue, peas
pilly, lemon - oranges - bread - all
hadn't had good things - He made quite
a little fuel. All's over - we & the
chained the old music - Caddy & Willie
great - applause (if they) - and
arrived at what - pleasure Caddy
renewed to take in the show, who has
a wonderfully great heart - & mind

Her mind continues to bother her a good deal, by forgetting things, & not thinking, going well - & feeling no pain or - in her little above the etc.

Removal did not get - how the 1st - pathology measuring - had before & had - stopped - I think he reported his. High & it - at least - let a little experiment & light - into the several cases - but - I fancy the least - but - it is a mass of matter, nothing any use to the College - or teachers' say - least - had undoubtedly disappeared & repeats all with the copy right of & another that it - was there - but - being 15 - is right - in any case there seems
