

Mrs. Crane

Stoneleigh,

Rock Ferry.

Acc. 1377

My dear Mr. Brewster

I must not delay longer
writing to thank you all
for your great kindness to
Carrie. She has indeed had
a delightful visit to you.
If it will be her own fault
if it has not also been improving
her education has been sadly
interfered with on account
of her health and eyes.

It seems wonderful that
you were not all worn out
with such a succession of
entertainments, & the heaviest

share of the responsibility
would have rested on yourself.
far as Mrs M. Phail's diet to me
may fear since, with reference
to fattening muscard-meals
came three times every day

The Scientific Congress seems
to have been a success, & to have
been favoured with fine
weather. Science & amusement
seem to have been combined
in about equal proportions.
Carries letters all cut with
a wish to remain in Canada
all winter, as far so thickly
wish me to do. But I'm aware

and I fear the long severe
winter would be too trying for
her. She bears fatigue remark-
ably well, but her circulation
is very slow, and here she
suffers dreadfully from
 chilblains in both hands
and feet, and the great
contrast between the heated
houses & the frost of the open
air would we fear be too trying.
I dare say you have discovered
that it is almost impossible
to keep her inclosed any at once
otherwise we would be very glad
indeed for her to remain, she
wants enjoy it very much
A letter for Arthur has arrived

to day from your son George
dated Calis. we were very glad
to learn his whereabouts, as
his letters had been uncommon
lately due for want of an
address. Arthur & the girls
are still in Scotland, but we
expect them home soon, so we
are quite alone, Darby & Isaac
He had a charming visit to Scot-
land lately, just to the High-land
of Perthshire, & then to Fife.
I am sorry to say Mrs Scott's health
is not at all satisfactory, she
suffers from her head & from
rheumatism. Excuse the period-
ical regards to all your family,
and believe me
your affectionate Cousin
Sept 27th Jane Crow
