Montreal

Oct. 22nd 1894

Dear Anna,

I was very glad to

get a more cheerful letter from

you to-day; for I will know

how anxious and worried

you must be about the

question of quarters. As to

food if you have only a

few things that are well

cooked it is far better than

having a great variety of

poorly cooked dishes.

We have had a lovely day

here and Cleve. has been

our for another ride Mrs
Molson has very kindly pre-
sented her with a ticket for
ten rides and I am very
glad as she seems to enjoy
them greatly. Clara is fitted
in her class and Ruth 13th
- I think there are 20 in the
class.
George came down on
Saturday evening and returned
to Ottawa this morning. He
is looking well, but was dis-
gusted at having to return
so soon from the field. From
all I hear by fancy there is
little doubt that George will
soon be superannuated and
for good at the head of
the survey. He came in

\$

yesterday afternoon and
showed the kindest interest
in our troubles.

Before this I hope Adams
has written to Indean - he
promised to do so on Saturday.
Tom father also saw Craik
yesterday afternoon and he
said that he would write at
once and explain the circum-
stances of the case as far as
possible. These letters should
have some effect.

I hope the diarrhoea has
passed off and that it was
due only to ordinary causes. I
am glad too that @ feels able
to get about a little more.
Altogether it should be much
less dull for him & for you

than it was called at Elizabeth
bethtown.

Mr. Nelson has talked some
of going out with Mr. M. to see
you, but if you suggest the
idea of their building stays for
the San Lame you will frighten
them and they will not go.

I told her this a.m. that I hoped
they would be able to go, but
she said it was very uncertain
and that I had better not say
anything to you about it.

I had just written to you yesterday
but was prevented both afternoon
and evening by George's emergency.
This too has been a busy day &
meeting of Mission Committee, &c.
but I have stood it very well.
On the whole I think I am pulling
up a bit. They get certain troubles
one less. The constant tiring and
minutes of the hands I cannot
make out.

My mother wants to put a gas stove in
the library but I am afraid of the
products of combustion. I am afraid of the
