

Rideau Club,
Ottawa.

Aug. 19. 95-

My dear Anna,

I went round
today & got a bicycle which
I think should suit Cous'
requirements, but is too long
in the leg part he will have
to try to grow up to it.
It goes down & separates
tonight. He will have to
study it closely & get
some advice about it in
order to know what to do

with all its parts &
 what not to weddle with.

It seems to me that a book
 of instructions should be
 furnished with so complicated
 a machine.

I hope to get away tomorrow
 for the west & shall I think
 be absent at least two weeks,
 for I have to drive about
 100 miles beyond the Rail way
 & back again, which takes
 time. A note from Father
 reached me today, from
 which I am glad to know

that all at metrics are
 well. Possibly I may be
 able to get down there
 for a day or so later, but
 I can scarcely tell

yet

Yours
 Guy C.
