

Little Metes
 Aug 2/86

My dear Dr. Huntington

I have received yours of Jul 28 and note what you say as to Searge. If Selwyn has actually recommended Whitears I should suppose the Govt will give it to him; but I have thought it not right to mention Searge's name, and have had a little slip printed & circulated, which I send you copies. Perhaps, if not successful now, it may aid him again. I am not quite satisfied that he should remain long in a position where his special knowledge will rust out and where he is isolated.

As to yourself, I would not advise to start two streets in the position of chemists. As the Survey now is, you are Mineralogist-Geologist and Mining Engineer as well, and also to some extent

Such a director, all the way
 to some extent be thankful and
 nervous, but it may have its
 advantages, with reference to
 the future. If a good and able
 man could be had as Palace
 intendant you might have some
 relief from proof-reading, he, but
 if you get a lawyerman the burden
 will remain. Still you should
 not get of this will give salary
 in proportion.

As to chemistry, I am pushing
 inquiries on all hands as far
 as I can, but have no certainty
 as yet, ~~as to~~ ~~there~~ ~~any~~ ~~good~~
 men in the U. States who
 would app. If you hear of
 any please mention the vacancy.

With reference to visiting the
 Exhibition, I am getting so good a
 rest here and so good a chance
 for work ready that I cannot
 think of leaving; besides there

is no reason why I should not be a Representative
 Canadian Prince, and indeed I have already
 its government has never in any way acknowledged me,
 and I have no other position in the world. The
 case is different with me. I have a recognized
 position and my long years of service in various
 fields and in making me known. It would seem
 me would please I meet the Queen & the
 British Army, but I cannot do so unless he
 can come to Montreal. I would be glad
 to meet him there. I have in the end of August
 and beginning of September, to see in New York
 and in sharp style, and can do this
 in them and in sharp style, and can do this
 further in presence of my collection of ship funds
 which is sufficient to buy the best in America. I would
 also provide for his education of my countrymen

Dr. [unclear]

P.S. I was very glad to find from
a note you sent to Anna
that after all the trouble
the college people took, &
report of the Quebec advisory
Board, and ^{at} an expenditure
of about \$150 for photos &c,
they have not been ex-
hibited. You may say
to Percival that we shall
certainly make a serious
remonstrance about this,
if immediate attention is
not given to it. In
any case I hope the
articles sent will be
safely returned to us.
