

Mr. Hercher - class  
which have been  
committed for trial  
at - seems to be in  
March - Robinson  
has been discharged  
Mr. - has apparently  
confessed to having  
attained in this last  
year - the other two  
are accused of them  
wh. took place  
last spring

Wednesday evening  
Dec - 1890

B. J. H. on trip to New  
Haven etc

your long letter  
from New Haven was a cordial  
to my heart, it is delightful to  
think that you met such a  
welcome, & that years had not  
caused the remembrance of  
you to fade - I dare say you  
did not realize till you got  
among people of culture & leisure  
how grinding was the life of  
continual toil that you have  
submitted to - I am aware of it  
myself in glimpses - I know how  
much better many things would  
go - I have much more good  
humoured & effective her  
management of the young men  
might be, if we were not bothered  
so constantly at the ~~base~~ of  
our powers of endurance &  
consequently, sharp set, & irritated.  
There undoubtedly must be a

possibility of being all we  
ought to be, under the most  
trying circumstances - but I think  
that faith & patience will be  
fully-pledged when our attainments  
to it = "Overcoming" all difficulties  
is the aim - still we sorely  
ought to avoid more our strains  
than we can help, & I earnestly  
hope that there is now a tide  
in your affairs that may lead  
to better things - Wm was speaking  
today again of the new depart-  
ment - the C. & R. - wish to make  
of Humphreys wants him to visit  
the Physical Laboratories in  
connection with the R. H. in the  
States - if he finds it not the time  
far him wd it be a part worth  
your thinking of - By the way  
Wm has a fortnight's holiday  
& wants to dabble in some  
chemical matters, & wd much  
like to be allowed to use some  
of the apparatus at the Laboratory  
- I'd be so in your absence -  
his time will be over before  
you return - He took Con-  
Victor for a walk today, which  
was quite a treat for them  
& explained various wonders to  
them by the way - I went to  
town with Carpy today, & helped

See - through her M. having - as well as I could.  
He is really fit - for the fatigue & excitement of  
such an expedition, her habit is the best of  
a laborer ever -

Eric's cold seems to be passing off  
without much taking hold of him - but for  
thee say to a great deal of cold - think  
twice off - he goes out - as also the  
incubator, we have had nearly cold ever  
since you left - The little boys were out  
playing with our children on the beach, both  
I received greatly to enjoy it - and I would  
a furious weather, very few cold people  
have had an evening since of showers,  
they are the weather - I wish I could  
showy heard from you - at 4 1/2 - no  
news - have got - this for - no  
parting this also there, as I do not know  
Miklaughia arrives - I am afraid I cannot

with every day I indeed I need every  
minute of get Eric's payments in ahead &  
do the regular shopping - I wanted to see  
people who had to be seen to all - I was  
in some fashion - I will never be known  
as Elizabeth Taylor's as some small book  
has the children with will perhaps has  
longer as a pleasure I know a charming  
& handsome set of blocks for Robert and  
Sisters & very ingenious & amusing also very  
little things both the & some ones - I a little  
buy the last got - and thing for some get  
hope to tomorrow, by these very chance  
I was returning by parents of & out to & coming  
I would be nice for Eric - that school also was  
larger again the previous - I think only with the  
before I was only 20 I think of shopping with the  
that they is over for reasons however -  
with all love  
Anna
