

295 Chestnut St.  
June 8<sup>th</sup> 94

Dearest Bernard

I wish I  
could have written more fully  
to you but - it has been  
such a continual hurry -  
& as far as possible I have  
wanted to be with Eric  
who is entirely strangled as  
matters stand = . . . Do not  
worry about me dear - I am  
well enough in body =

I don't know what to  
say about Eric, this whole  
disease is new to me & I  
cannot understand what  
the doctors mean by what  
they say - The fever seems  
to be less - gaining less height

of drooping less below the  
line. His strength seems  
very little, & he is so drawn  
I take him a beaten egg  
egg early in the morning  
then later he sits up, & take  
a fairly good breakfast  
then closes off again till  
1/2 or so. I have had to  
be out most mornings, I  
have him milk & egg to  
take when he gets up. The  
weather has been too bad  
to go out much but now  
is better after dinner I  
have to coax him to go out  
& walk a little & perhaps  
drive a little & he went  
to town day before yesterday  
with me in the car, got  
an overcoat & some collar  
& so on he needed & then

can above with a little of the paper I have  
I had - quite pleased that the day  
had - been tired & weary - he is not now  
I had much success with it - I have not  
I seem several to write a great many  
for a few days - but - now I am only  
to diminish a definite portion of  
has some pleasure in it - is receiving I  
can see it - but the talk is mostly  
about - as the doctor talks - I understand  
well - circles, which agree along  
my heart - as to the matter of changes  
I will not - in fact - to the way  
the matter for no party has been  
I have not at hand - but I am to come  
with a letter of delay if I have to  
I have been very busy - I have not

social with the feeling of our former but  
if I become slow of foot & vie me soon  
more of private part with a Epic state  
I think I must send for you  
Dear here I am so good for you  
Dear Howard part of the out side  
Dear picking up money - you  
may be assured that if you have  
no colla before you get this that  
no less and in any subject I as far as  
I can assist them. However I think  
I should hope my best for all this is  
that that being done and set in life  
I should hope of your mother's health  
of the best part of my life & be able

typographical she can't come & I  
have replied she must - what  
next comes we shall see -  
but - none of these things  
trouble me clear - It is only  
Eric - Had clear Carpy  
sent me 100 as the other day  
wh. she said I was to use  
for me & Eric, it - was left  
to him in her will in any  
case - George puts himself  
& unlimited cash at my  
disposal - Every one very  
good.

Yours lovingly, I think  
I'd hear all the trouble  
for you dearest - dearest  
Conrad wants a cricket  
ball, desperately - Ruth  
was first in her class - I  
suppose I will have to have  
her vaccinated - & the other  
children also - as public decrees  
have been made about it -  
but how we can manage it - at  
I don't know - Lovingly Anne

devote myself to being "it" - it <sup>is</sup> ~~is~~  
be easier, but - it is rush &  
shop - I pack up trunks, & so  
on - I have told you all the  
truth love - as far as I know  
it, but - whether I fear too  
little or too much - I do not  
know -

I will write all I can  
find out - by Monday's mail  
& cable at once if I think  
matters look badly - far  
now you know the trouble  
you cannot enjoy anything  
else - But do my darling  
pray for us all - I be as  
careful as you care of your  
own dear self - I don't think  
of the other children - I  
only wish they were away  
& I had my time to see to  
Eric, Kate & Cullock has
