

Letete hietis.

Sept-12<sup>th</sup>/95

Dearest,  
I found that no  
mail co. go justed after 5  
so did not manage to  
write last night - so far  
we have scarcely settled  
down, to the mess arabs  
of things - Lily being stragg  
& the scrubber not turning  
up till today - also the  
weather is cold & cloudy  
neither wet - as fine  
Eva & Muffy certainly have  
colds - Eva is the only one  
who looks at all the  
worse - but fine weather  
& hope will soon put  
her right - we had sea  
bowl for breakfast &  
Turkey - & flowers for tea

we are not-likely to starve  
& today our Mulhewson  
brought us a pair of duck  
he has taken Herbert under  
his wing, & today they are  
off to Tartague - One sees  
plenty of game from the  
shore, & Courcel is still  
wield to join in the sport  
but he has stoutly declined  
several invitations from  
Herbert, on his own account  
without appealing to me.  
& I will do my best to  
let him be happy in some  
other way. They all put  
a little parlour, without  
the usual occupations &  
the weather not-favourable  
But that will pass off.  
& I hope the gravel sorting  
will leave us all with  
a feeling of repose & freedom.  
Nobby came running in  
dinner yesterday crying papers  
papers - & looked quite lost  
when no papers was to be seen

Also he is much admired at being  
pinned up there. but they will show  
his true. I had a very pleasant  
recreation after from St. Lawrence, who is at  
right now - I went to his a few days  
ago - he has three step-children, but  
right now - Victor has son & I should  
hardly at the head of his class amongst boys  
of his own age.

Finally I may write that my  
aunt is too much out of health to  
my. Nothing is very much as to  
the will at all. I understand more  
also not see any light in the  
I believe one of the best  
work but delicate in quality &  
very soft in her seeing. I  
very desirable. In the  
my richness can take more  
myself just out of Sunday school.

you might find out about the college  
girls - whether they are allowed to  
attend - little wonder retaining is  
well to teach, but if one only get the  
person he will get to start that we  
him to go on successfully at school; do  
not be surprised if school process or  
elementary law had found the  
Kinnearville  
of \$450 with the certificate as \$500 - with  
I have no doubt it will eventually be  
rough - about my own affairs of it - for  
well spend money to time, I thought on it  
far more than the other things - I have  
will receive - 11 - 1000 is a fair price  
mother never saw the things - I thought that  
at last she will have a price - 10 days - but  
she is bargaining with the price now; that  
ones the hand yesterday till she was left  
I has received knowing the price with the  
the - 1000 - I would like to see it - I mean

do what I can - It does  
make life so difficult.  
& I doubt I shall be being  
at all grateful when all is  
done - I hope if you remem-  
ber this house which has  
been such a blessing to us  
was forced upon us in  
much the same way - so  
one never can tell how  
things turn out -

I shall hope to have  
good news of you & the  
dear girls - If only Clara  
was in better case how-  
ever if she catches or 'tummy'  
please make her try the  
sprey & see if that does any  
good - she will enjoy the  
school if it is not too  
much for her, & the Bibles  
I hope she will be able to  
go on with -

Lair says she hopes you  
liked the poundenches & she  
gives you  
her love  
Sincerely  
Anne
